JAPANESE COUNCIL OF SCIENCE MUSEUMS

JCSM

Japanese Council of Science Museums

Benefits to Affiliated Members

JCSM provides a variety of learning sessions and information services to the affiliates who are involved in the management of museums.

Please join to the membership for making your museum even more attractive.

General meeting

Study Tour at leading overseas science museums

Presentation on research
at international advanced science museums

Promoting Networking among Museums

1. General meetings (June, February)

Report the project master plan and the annual budget, and holding a lecture on high interest topic to museum workers.

2. Annual symposium (February)

Having a discussion on common issues in the museums and presenting results or products of museum activities.

3. Tours of recent museum exhibits

Conducting a back-yard tour to newly-opened institutions or renovated permanent exhibits in the museums in conjunction with the annual symposium and general meeting.

Providing Training Courses

1. Curator training course (November)

Co-host of JCSM and National Museum of Nature and Science (NMNS), provide courses approx. 4days for collection and preserve specimens, research, exhibit, and educational program.

2. JCSM study tour (January)

JCSM has sent official delegations to the leading science museums and facilities in foreign countries in order to research on operation, exhibition and educational program. (approx. 10 days)

3. Research at international advanced science museums

Select few curators by educational carrier or research papers, and send them to museums and educational facilities in Euro-American nations.

Provide Latest Information

1. Publish "JCSM News"

(in odd months/6 times per year)

Articles feature on museum operation, exhibition, education, maintain materials/specimens and research. Report on updated overseas museums information; Announcement of special exhibitions; Information on renovated exhibits/museums.

2. Official website of JCSM

Posts various contents and necessary information are available on the website as well such as announcement from the secretariat, detailed information on public invitations, reports on training projects, discussions and case presentations from research symposiums. Past JCSM News are also available.

3. Utilize email list

This is a sort of closed social community in JCSM among called upon like-minded members using their email addresses for data gathering or having discussion on specific topics.

Full-scale Support for Museum Activities

Supporting to conduct or coordinate a traveling exhibition or other special exhibitions which are produced by National Museum of Nature and Science or other institutions to enrich the museum activities/programs. The museums should be paid for the shipping fee and shipping insurance but the rental cost for its exhibition is free of charge.
